

Applicator Rod and Bed for surface sizing and coating

General:

Our rods and beds are made from high standard materials to ensure best performance and reliability. We utilize manufacturing and surface engineering processes which are tailored to produce most accurate results for applicator rods and beds.

APPLICATOR RODS

Feature:

- *Hi-grade alloys*
- *Wear resistant platings*
- *Extended non-stick property*
- *Improved performance*
- *Standard diameters 10...45mm*
- *Tailored surface and diameter according customer need*
- *Standard coating thickness 25...50µm*
- *Maximum rod length 11m*

ROD BED

Feature:

- *Excellent wear resistance*
- *Chemical and heat resistance*
- *Resulting a high stability with smooth rod rotation*
- *UHMW-PE*

Other:

- *Couplings*
- *Universal joints*
- *Sealing blade etc.*
